

Tetra Blend

Seed Blend

USE	SOWING RATE	BENEFITS	BLEND
High traffic walkways on parkland golf courses	25-40 (g/m ²)	Germination at low temperatures	70% Perennial ryegrass
Stadiums		Rapid establishment	30% Tetraploid perennial ryegrass
Sports fields		Hard wearing	
Cricket outfield		Drought tolerant	
		Good recovery from wear	
		Dense sward	
		Good year-round colour	

TETRA BLEND establishes rapidly even at low temperatures. Its good root establishment also helps during drought stress whilst holding the surface together better.

TETRA BLEND is a fully certified blend (O.E.C.D label) which shows the actual components of the blend and their percentages. It has great year-round colour with a dense sward that helps to keep out weeds.
